TECHNICAL SKILLS

- Frontend: React, TypeScript, Redux Toolkit, HTML5, CSS3, SCSS
- Backend: Node.js, NestJS, MongoDB
- Mobile: React Native
- Cloud: AWS
- Version Control: Git
- APIs: RESTful APIs
- Programming: JavaScript (ES6+), DOM manipulation, OOP, Functional Programming

LANGUAGE

- English B2

SUMMARY

A dedicated full-stack developer with advanced proficiency in React, TypeScript, Node.js, NestJS, MongoDB, and AWS. Skilled in crafting web and mobile applications that optimize business processes and contribute to digital transformation. Possesses a keen eye for detail, a logical approach to problem-solving, and a blend of

WORK EXPERIENCE

Front-End Developer at Capgemini Engineering
2021 - present

Contributed as a Front-End Developer at Capgemini Engineering, an outsourcing company, delivering high-quality web and mobile applications for client projects including SalesTool, KatalX, and Ericsson.
Collaborated with cross-functional teams to ensure seamless project execution and high-quality deliverables.

Front-End Developer
2021 - 2022

SalesTool Project

- Developed and maintained web applications for business intelligence optimization using React and TypeScript, contributing to improved client operations.
- Implemented secure authentication mechanisms using OIDC client and React-Auth-Kit.
- Configured routing with React Router for seamless navigation.
- Designed user interfaces following Material Design principles to ensure intuitive experiences.
- Utilized Axios for efficient server communication and developed robust form handling and validation.

KatalX
2021 - 2022

- Built web applications for cargo tracking, integrating Google Maps API for real-time route visualization.
- Displayed critical container data (e.g., graphics, temperature) using third-party APIs.
- Implemented booking functionalities for airports and seaports, streamlining cargo management processes.

Ericsson
2022 - present

- Contributed to the front-end development of a mobile application for workflow handling using React Native, ensuring cross-platform compatibility.
- Developed new features and optimized performance to enhance user experience.
- Configured micro frontends to support modular and scalable application architecture.
- Designed and implemented UI components adhering to Ericsson's proprietary style library for consistent design.
- Built Backends for Frontends (BFFs) to optimize data interactions between the mobile app and server-side services.
- Utilized AWS services for deployment and infrastructure management.
- Managed database operations, including schema design and query optimization.
- Integrated real-time communication features, such as chat, using web sockets.

EDUCATION

National University "Odesa Polytechnic"
2021 - 2024
